2018-1-TR01-KA203-058252: Immersive Business and Engineering English in Virtual Reality (I-BEE-VR)

Module 1 - Task 2: Job Interview

Real-Life Task 2: Taking part in a job interview

The following task will be a VR task. You will virtually take part in a job interview about the job relating to the job ad you picked at the beginning of this module. In the job interview, you will be asked a set of questions that you have to answer.

Preparation

To prepare for the virtual job interview, do the following:

- Watch the video, where an engineering expert talks about his recruiting experiences and his recommendations for job applicants.
- Go through the questions discussed in *Module 1-Task2-Activity 2*.

Prepare effective answers for these questions based on the job specifications in your job ad, and on the recommendations given in the video. When formulating your answers, take into account the points about interview questions discussed in class, and also pay attention to appropriate interview language (e.g. politeness, formal register).

VR job interview

1. Take part in the simulated interview. Answer each of the questions asked on the basis of what you have prepared. Your answers will be recorded.
 2. After having completed the VR interview, get together in groups of 3. Take turns listening to each group member's answers, and give each other feedback on your performances. Make suggestions on how your answers could be improved.
-
